

Web Design

Week 3: Responsive Design

Responsive Design

Responsive Web Design is a development approach that makes a website look and work great on any device, from a giant monitor to a tiny smartphone.

Fluidity

- Everything is sized in percentages, so it stretches or shrinks.

Adaptability

- Images and text resize so they don't "break" the layout.

Intelligence:

- The site uses "Media Queries" to detect screen size and move elements around (e.g., stacking columns vertically on mobile).

Class Vs ID

Class vs ID

A class is an identifier that you can use on multiple elements across a page. Use it when you want many things to look or behave the same way.

- **HTML Syntax:**
`<div class="card">...</div>`
- **CSS Syntax:**
`.card { background: blue; }`
- **Real-world analogy:**
A "Student" uniform. Many people can wear the same uniform.

An ID is a unique identifier meant for only one single element per page. It is much more specific and powerful than a class.

- **HTML Syntax:**
`<div id="main-header">...</div>`
- **CSS Syntax:**
`#main-header { font-size: 24px; }`
- **Real-world analogy:**
A Social Security Number or a Passport ID. Only one person should have it.

Class vs ID

```
<!DOCTYPE html>
<html>
<head>
  <title>Class vs ID Example</title>
  <link rel="stylesheet" href="styles.css">
</head>
<body>
  <h1 id="main-title">Welcome to My Website</h1>
  <p class="text">This is paragraph one.</p>
  <p class="text">This is paragraph two.</p>
  <button id="special-btn">Click Me</button>
</body>
</html>
```

Class vs ID

```
/* ID selector (use #) */
#main-title {
    color: blue;
    text-align: center;
}

/* Class selector (use .) */
.text {
    color: green;
    font-size: 18px;
}

/* Another ID */
#special-btn {
    background-color: orange;
    color: white;
    padding: 10px;
}
```

**Let's start to create
responsive web**

Responsive Design

```
<!DOCTYPE html>
<html>
<head>
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Responsive Example</title>
  <link rel="stylesheet" href="style.css">
</head>
<body>

  <div class="container">
    <div class="box">Box 1</div>
    <div class="box">Box 2</div>
    <div class="box">Box 3</div>
  </div>

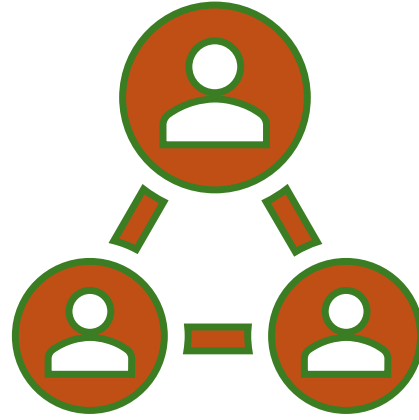

</body>
</html>
```

Responsive Design

```
.container {  
    display: flex;  
    gap: 10px;  
}  
  
/* Default (desktop) */  
.box {  
    flex: 1;  
    background: lightblue;  
    padding: 20px;  
    text-align: center;  
}  
  
/* Mobile (screen ≤ 600px) */  
@media (max-width: 600px) {  
    .container {  
        flex-direction: column;  
    }  
}
```

**Any Question?
or**

ចេះអស់ហើយ?

Team Activity

Each team should use paper to sketch and brainstorm ideas for an online-selling website. After finishing, take a photo of your work, send it to the Telegram group, and be ready to present it to the class.

Homework

Using provide template, edit that code for update your information in template.

See you next week!
