

Web Design

Week 2:CSS Styling

What is Style?

“a particular procedure by which something is done; a manner or way.”

Rule of Style & Design

The Three Golden Rules

1. **Form Follows Function:** An object's beauty (style) should never get in the way of its purpose (design).
2. **Curated Exclusion:** Style isn't about what you add; it's about what you choose to leave out to keep the look cohesive.
3. **The 60-30-10 Rule:** Balance is achieved through a dominant element (60%), a secondary support (30%), and a bold "pop" of contrast (10%).

“Less is More”

Color Standard Code

1. RGB (Red, Green, Blue)

The Additive Model. This is based on how digital screens work by mixing light. Imagine three flashlights (Red, Green, and Blue) shining on a dark wall.

2. HEX (Hexadecimal)

The Designer's Shorthand. HEX is essentially a compact, "code-friendly" version of RGB. It uses a base-16 numbering system (0–9 and A–F).

3. HSL (Hue, Saturation, Lightness)

The Human Model. HSL is the most intuitive for creators because it describes color the way our brains actually perceive it.

CSS

What is CSS?

CSS is the language we use to style a Web page.

CSS

CSS Syntax

Selector

h1

Declaration

Declaration

```
{color:blue; font-size:12px;}
```

Property

Value

Property

Value

CSS

Type of CSS

1. **Inline CSS:** Inline CSS is applied directly to a specific HTML element using the style attribute.
2. **Internal (Embedded) CSS:** Internal CSS is placed within a `<style>` tag inside the `<head>` section of a single HTML document.
3. **External CSS:** This is the standard for professional design. You create a separate file (e.g., `style.css`) and link to it from your HTML files using the `<link>` tag.

Basic Style of CSS

CSS

Color CSS

Example:

```
h1{  
    color: rgb(39, 39, 151);  
}
```

Background Color

CSS

Example:

```
body {  
  background-color: lightblue;  
}  
h1 {  
  background-color: green;  
}  
  
div {  
  background-color: lightblue;  
}  
  
p {  
  background-color: yellow;  
}
```

CSS

Background Image

Example:

```
body {  
    background-image: url("bgdesert.jpg");  
    background-repeat: repeat-x;  
}
```

```
body {  
    background-image: url("img_tree.png");  
    background-repeat: no-repeat;  
}
```

CSS

Borders Style

Example:

```
p.dotted {border-style: dotted;}  
p.dashed {border-style: dashed;}  
p.solid {border-style: solid;}  
p.double {border-style: double;}  
p.groove {border-style: groove;}  
p.ridge {border-style: ridge;}  
p.inset {border-style: inset;}  
p.outset {border-style: outset;}  
p.none {border-style: none;}  
p.hidden {border-style: hidden;}  
p.mix {border-style: dotted dashed solid double;}
```

Fonts

CSS

Example:

```
.p1 {  
  font-family: "Times New Roman", Times, serif;  
}
```

```
.p2 {  
  font-family: Arial, Helvetica, sans-serif;  
}
```

```
.p3 {  
  font-family: "Lucida Console", "Courier New",  
  monospace;  
}
```

Icons

CSS

Example:

```
<!DOCTYPE html>
<html>
<head>
<script src="https://kit.fontawesome.com/a076d05399.js"
crossorigin="anonymous"></script>
</head>
<body>

<i class="fas fa-cloud"></i>
<i class="fas fa-heart"></i>
<i class="fas fa-car"></i>
<i class="fas fa-file"></i>
<i class="fas fa-bars"></i>

</body>
</html>
```

Team Activity

In assigned groups, use HTML to create a structured "Brainstorming Website" that outlines a unique project idea. Once completed, your group will present the live site and your code structure to the class.
